### *Development, results of the activity and state of the company in 2024.*

" Easy Asset Management " AD (Easy Credit) is among the largest companies in Bulgaria for non-bank consumer loans granted to customers' homes and one of the fastest growing in its segment in Eastern Europe. And in 2024, Easy Credit continues to make its services more and more accessible and user-

friendly. It lends money nationwide with the help of more than 2,000 credit counselors and nearly 200 offices serving more than 1,200 localities. Apart from Bulgarian Post branches, loans are also offered by more and more partners of the Company. Customers have the opportunity to apply for a loan entirely through the Easy Credit website or mobile application. The partnership with Western Union, which started in 2019, allows receiving and sending money quickly and easily to/from anywhere in Europe. Through one of its subsidiaries - "Financial Bulgaria" EOOD, Easy Credit offers its users the provision of a guarantor when granting loans. Against a certain fee and conditions, the guarantee company undertakes to repay the debts to the lending company. In June 2023, Easy Credit started a successful partnership with Insurance Company Instinct AD, offering its customers an insurance product that protects and supports them in unforeseen circumstances related to their health.

Since its launch more than 18 years ago, the Easy Credit group has granted more than 5 million loans in Europe. For the past year 2024, nearly BGN 268 million have been allocated as loans to consumers (BGN 232 million in 2023) or a growth of 15.51%. The amounts collected for the period are nearly BGN 373 million. (BGN 327 million in 2023) or a growth of 14.15%. The gross credit portfolio of the Company as of December 2024 is BGN 107 million or a growth of 13.93% compared to the previous year.

| <i>from 4 to 90 days</i>                         | 33 311    | 28 703    | 16.05%   |
| <i>from 91 to 360 days</i>                       | 27 882    | 24 268    | 14.89 %  |
| <i>with indefinite maturity (incl. judicial)</i> | 971       | 972       | 0.10%    |
| <b>Active customers</b>                          | 124 363   | 124 064   | 0.24%    |
| <b>Number of loans granted</b>                   | 277 646   | 264 817   | 4.84%    |

In its activity, the Company operates in a highly developed and competitive financial services market, which is why it is affected by price risk. Part of the Company's competitors are banking and financial institutions that have access to a cheap financial resource, providing them with an advantage in the pricing of competitive products.

"Easy Asset Management" AD manages the risk of non-payment by the customers of the sums due on loans and the interest due through developed internal rules for managing the credit activity. The rules regulate the requirements for granting loans, classification of risk exposures and formation of provisions for impairment losses.

In order to manage credit risk, the Company has developed strict procedures for the analysis and evaluation of potential borrowers, including developed scoring procedures and detailed verification of the data provided. Easy Credit has an effective system for monitoring payments, as well as active measures to collect receivables. Management carefully monitors its exposure to this risk at each stage of the loan.

In terms of liquidity, Easy Asset Management AD at all times maintains liquid assets (including cash and current accounts) sufficient to satisfy the demand for loans and cover current payments. This is

necessary due to the special distribution network of the Company - over 200 regional offices and over 2,000 credit consultants, who need to have available funds on a daily basis in order to be able to realize one of their main goals of quick and easy service and granting of credit.

|                    | <b>2024</b> | <b>2023</b> |

| <b>Loans</b>       | 277 646     | 264 817     |

### **Going concern**

The management of Easy Asset Management AD considers that the Company is and will continue as a going concern entity and has no plans or intentions to discontinue its activities.

### **Fair value of financial assets and liabilities**

Fair values of loans and receivables, as well as liabilities to third parties, are determined using a present value model based on agreed cash flows, taking into account credit quality, liquidity and costs; their fair value does not differ materially from their net carrying amount. The fair values of contingent liabilities and non-cancellable loan liabilities correspond to their carrying amounts.

For financial assets and financial liabilities that have a short-term maturity (less than three months), it is assumed that the carrying amount is close to their fair value. This assumption also applies to demand deposits and time savings deposits.

IFRS 7 "Financial Instruments: Disclosure" requires the explanatory notes to the financial statement to contain information on the determination of fair value in accordance with IFRS 13 "Fair Value Measurement" of financial assets and liabilities that are not presented at fair value in the statement of financial condition. IFRS 13 defines a hierarchy of valuation techniques, depending on the extent to which the inputs to the models are observable or unobservable. Inputs that can be monitored include market information obtained from external information sources; unobservable inputs include the Company's assumptions and judgments.

These two types of inputs define the following hierarchy of fair value estimates:

- Level 1 – quotes from active markets for identical financial instruments. This includes listed equity and debt instruments
- Level 2 – inputs other than Level 1 data that can be observed directly or indirectly (i.e. can be derived from market prices).
- Level 3 – inputs that cannot be observed and/or based on external market information. This group includes instruments whose significant components cannot be observed.

The above hierarchy of valuation methods requires the use of market information whenever possible. When performing the evaluations, the Company takes into account relevant observable market prices in cases where this is possible.

Fair value of financial instruments:

|                                                                     | <b>As of December 31 , 2024</b> |                   | <b>As of December 31, 2023</b> |                   |

| Lease liabilities                                                   | -              | -              | 3 051          | 3 051        |
| Trade and other payables                                            | -              | -              | 36 188         | 36 188       |

The main risks faced by the Company are market and operational risk.

- **Market risk**

The Company is exposed to market risk, which is the probability that the fair value or cash flows associated with financial instruments will vary due to changes in market prices. Market risks arise primarily from positions in interest rate, currency and equity products that are exposed to general and specific market movements and changes in the level of market rate or price dynamics. Due to the specificity of the Company's financial instruments, it is primarily exposed to interest rate risk.

- ✓ **Interest rate risk**

Interest rate risk related to cash flows can occur when changes in market interest rates affect future cash flows from financial instruments. A possible interest rate risk related to the fair value is that when the value of a financial instrument changes due to a change in market interest rates.

The company is exposed to both risks – related to fair value and related to cash flow. Interest margins may increase as a result of these changes, which in turn would limit potential losses to the Company arising from changes in market interest rates. Trade and other receivables / liabilities are not interest-bearing.

- ✓ **Currency risk**

Fluctuations in exchange rates affect the Company's financial position and cash flows. As a result of the currency board, the Bulgarian lev is pegged to the euro at a leva-to-euro ratio of 1.95583/EUR, which means that positions in this currency do not lead to significant currency risk unless the ratio is changed in the future.

- **Operational risk**

Operational risk is the risk of losses due to systems failure, human error, fraud or external events. When the established control systems and activities do not prevent such events, operational risks may damage the reputation, have legal or regulatory consequences or lead to financial losses for the Company. The

Company does not expect to eliminate all operational risks, but strives to manage these risks by building a good control environment, as well as by monitoring and managing potential risks. Control measures include effective segregation of duties, definition of access rights, authorization of transactions, and reconciliation of information from different sources, training and evaluation of personnel, and other types of control.

The Company benefits from all the new approaches, bordering on art, which contribute to optimizing the balance sheet according to the business objectives. Invests in a team of big data analysts leading in terms of knowledge and performance (data scientists). There are outstanding software developments in risk valuation and monitoring.

Another priority is related to the ability to respond to the increasingly demanding legislative framework for processes related to money laundering, customer identification, storage and protection of customer data, etc. In this direction, investments were made at the group level (MFG) in a technological partner and in a complete solution unique to our market, which is already used in various markets of the Group. The solution provides fully digital full team scoring compatibility – checks in all sanction lists, negative media, special scoring that is customized for each product. This platform also provides transaction monitoring. Processes unique to Bulgaria have been developed for deep identification and customer identification. Cybersecurity training is part of the onboarding process of every employee, along with training on GDPR and AML, as new and new forms of training on the topics are introduced. Performingly in the organization and are passed at each company level.

### **Actions in the field of research and development**

The Company has not taken any action in this direction.

### **Company's branches**

The Company has no branches located in the country or abroad.

### **Capital management**

The Company's capital management objectives are to maintain a strong capital base to ensure the Company's ability to continue as a going concern and to provide conditions for development. There were no changes in the capital management approach during the period.

The leverage ratio (the ratio of net debt to total capital) as of December 31, 2024 and December 31, 2023 is as follows:

|                                | <b>December 31,<br/>2024</b> | <b>December 31,<br/>2023</b> |
|--------------------------------|------------------------------|------------------------------|
| Total debt                     | 152 887                      | 84 878                       |
| Less Cash and Cash Equivalents | (3 672)                      | (2 283)                      |
| Net debt                       | 149 215                      | 82 595                       |
| Equity                         | 190 683                      | 181 256                      |
| <b>Total capital</b>           | <b>339 898</b>               | <b>263 851</b>               |
| <b>Leverage</b>                | <b>0.44</b>                  | <b>0.31</b>                  |

### **Contracts under Art. 240b of the Commercial Law concluded during the year**

In 2024, the members of the Board of Directors or persons related to them did not enter into any contracts with "Easy Asset Management" AD, which go beyond the Company's usual activity or significantly deviate from the market conditions.

### **Information on the acquisition of own shares, required pursuant to Art. 187e of the Commercial Law**

The company has not acquired and does not own its own shares.

### **Human capital management**

One of the main priorities of the Company is the continuous improvement, training and development of employees. The directions in which we work are:

- Increasing technical skills and
- The successful creation, management and participation in teamwork

The Company's annual budgets include mandatory funding for the development of the technical and soft skills of all employees at every level in the organization. The internal training system is constantly upgraded with content to meet specific and growing needs, both for internal training on various topics such as cybersecurity and personal data processing, and for the acquisition of new knowledge and skills and the upgrading of existing ones.

Additionally, people have access to various online learning resources.

### **Responsibility to society**

"Easy Asset Management" AD, as part of the MFG group, creates sustainable business models, using group resources (human, technological, financial and time) efficiently and effectively to promote a sustainable business environment inside and outside the group.

The main mission, goal and activity of the Company - to provide an opportunity for financial inclusion to everyone regardless of their current social and financial status, influences the development of communities and economies not only at the local but also at the national level.

The Company's work also affects the lives and businesses of our clients.

The regional divisions of the Company, as well as the centralized structures, periodically participate in projects to improve the urban environment, incl. with the Company's funds and with the employees' personal funds and voluntary work.

In order for employees to feel useful and satisfied, it is necessary not only to offer them interesting and profitable work, high social status and harmonious relations in the family, but also to have the opportunity to return to society at least a little of what they received through charity or voluntary work. It is an integral part of the general policy of the company and the Group (MFG), which further increases their commitment and inspiration.

At the group level, a calendar has been developed with internal activities aimed at the well-being of employees and at the development of local communities, environmental protection and support for vulnerable groups.

#### Calendar 2025

January - Humanity Month: focus on volunteering as an act, relationships with colleagues, customer service, ethical funding.

March - Women's Empowerment Month: focus on career development, harmony between work and private life, support of victims of violence with voluntary work and material assistance.

April - Earth month with a focus on environmental protection.

May is the month of innovation with a focus on the innovation of products, services and business processes.

June - month of the children in the group with a focus on their personal growth.

July-August – a month of responsibility with a focus on the development of local communities and causes recognized by the group (child health, sports, support of vulnerable groups).

November - men's health month with a focus on physical and mental health in the group, support and mutual aid, career and personal growth.

### **Responsible management**

For years, Easy Asset Management AD, as part of MFG, has been building its management structure with a focus on sustainability. The company strictly follows its values and principles of responsible behavior with its customers, employees, collaborators and partners.

The Company observes a uniform code of ethics, has working policies for reporting irregularities, and develops a categorical policy of non-discrimination, including in pay, on the basis of gender, sexuality, ethnicity and origin.

Statistics show that the predominant percentage of employees are women, with which the Company fulfills in practice its commitment to gender equality, in addition to its processes of attracting, hiring and retaining talent and for the social integration of vulnerable groups in society. As of 31.12.2024, the total number of employees in the Company is 1 619, in a ratio of 71.46% women against 28.54% men (as of 31.12.2023, the total number of employees in the Company is 1 559, in a ratio of 70,81% women vs. 29.19% men).

The Company has a code of ethics with a whistleblowing policy and anti-corruption policy.

Conditions are being created for Easy Asset Management AD to be a company where:

- people are hired and promoted on their merits (results and professional experience);
- opportunities for development exist and where a work-life balance is achieved;
- teamwork within individual business units is valued;
- people have the opportunity to develop their full potential;
- compliance with competitive standards in terms of remuneration, in accordance with the business strategy, philosophy and values of the Company;
- feedback is encouraged in every activity and in every workplace. Opinions and opinions are sought and accepted from employees, actively participating in solving problems in the Company;
- Managers develop their leadership qualities;
- Employees are encouraged to be proactive and deal with change constructively, anticipating it where possible;
- People are incentivized to proactively manage risks in their daily tasks.

### **Ecology and environmental protection**

The management of the Company pays attention to the reasonable way of using resources in order to optimize expenses and protect the environment. Highlights:

- Separate collection of waste in offices;
- Separate collection and recycling of batteries and depreciated office and other equipment;
- Collection and delivery of plastic caps;
- Reduction of paper documentation;
- Support of various environmental protection initiatives at the local and national level;
- Reducing the energy used - turning off work equipment, sparing use of air conditioners and lighting equipment;
- Direct purification of drinking water;
- Reduction of used water resources with the use of modern techniques.

### **Important events that occurred after the end of the reporting period**

For the period after the date of the report, the Company has not identified significant or corrective events that are related to its activity and that should be separately disclosed or require changes to the individual financial statements as of December 31, 2024.

On March 17, 2025, Easy Asset Management AD entered into an agreement to acquire a controlling interest in Easy Asset Management d.o.o., Croatia. Management expects the transaction to be finalized within the 2025 calendar year and the Company's operations in the Republic of Croatia to expand.

On May 8, 2025, a change in the composition of the Board of Directors of the Company was registered in the Commercial Register.

### **Planned development of the Company and prospects for 2025**

The correct attitude and the security, discretion, speed and convenience that Easy Credit provides to its customers are the leading reasons why consumers prefer the Company's loans.

We continue to follow the strategy of expanding into new markets in Europe, where the services we provide are well known and sought after by consumers. Our ambitions are to establish ourselves as one of the leaders in our sector in the region in the long term. Our strategy also envisages expansion into new markets outside of Europe.

### **Responsibilities of management**

The management of "Easy Asset Management" AD has prepared the financial statement for 2024, which gives a true and fair view of the state of the Company at the end of the year and its accounting results. The financial statement is prepared in accordance with IFRS accounting standards as adopted by the EU.

The management confirms that it has consistently applied an adequate accounting policy and that in the preparation of the financial statements as of December 31, 2024, the principle of prudence has been observed in the valuation of assets, liabilities, income and expenses.

The management also confirms that it has adhered to the current accounting standards, and the financial statements have been prepared on the going concern basis.

The management is responsible for the correct keeping of the accounting registers, for the expedient management of the assets and for taking the necessary measures to avoid and detect possible abuses and other irregularities.

**NON-FINANCIAL STATEMENT OF "EASY ASSET MANAGEMENT" AD FOR 2024**

This non-financial statement has been prepared in accordance with the requirements of Art. 41 and Art. 48 of the Accounting Law and is an integral part of the Annual Activity Report.

**1. Business model**

"Easy Asset Management" AD is a joint-stock company established on December 8, 2005, and operating in Bulgaria. The Company's headquarters and management address are: 28 Jawaharlal Nehru Blvd., Sofia, Bulgaria. The main activity of the Company, in accordance with the Law on Credit Institutions, is the granting of loans with funds not raised through public attraction of deposits or other recoverable funds.

As of the date of preparation of this financial statement, the Company is managed by a Board of Directors consisting of 5 people and represented by two executive directors.

**2. Company Policies**

**Environmental policy**

"Easy Asset Management" EAD does not produce any product and does not carry out activities related to the pollution of the environment and water.

**Social policy**

For the Management of "Easy Asset Management" AD, it is of great importance that the employed personnel are satisfied with their work and feel empathetic with the problems and achievements of the Company. The Company considers that social benefits for the personnel are an important prerequisite for the economic development of the Company and staffing with highly qualified personnel.

**Employee Policy**

Driven by the serious shortage of qualified labor and the dynamics of the market situation, the Company's Management is focused on constant care in order for every employee to feel satisfied with the provided working conditions and the provided opportunities for personal and professional development. The main tasks before the Management are the following:

- **Equality and respect for human rights**

The Company's management strictly observes the Constitution and laws of the Republic of Bulgaria and, in particular, all other normative acts concerning labor-legal relations. There is equality in employment, with no discrimination based on gender, race, nationality, ethnicity, citizenship, religion, political affiliation, disability and age.

- **Occupational health and safety**

The Company's management appreciates the importance of providing additional benefits in the field of health insurance, as a key tool for motivation and retention, and through a contract with a health insurance company offers additional health coverage to all employees under an employment contract with the Company.

**EASY ASSET MANAGEMENT AD**  
**NON-FINANCIAL STATEMENT**  
**For the year ending December 31, 2024**

---

(All amounts are in thousands of BGN, unless otherwise stated)

- **Professional development**

The Company's management gives every employee the opportunity to improve their qualifications by participating in seminars and training courses.

**Gender equality in management positions**

The Company effectively practices the equal treatment of men and women in their appointment to management positions, as well as the balanced representation of men and women in the decision-making process.

**Anti-corruption policy**

"Easy Asset Management" AD does not tolerate any form of bribery and corruption. In particular, the Company agrees to refrain from any actions and behavior that could be perceived as active or passive bribery.

**Major environmental risks**

The Company's activity does not lead to the creation of environmental risks.

## INDEPENDENT AUDITOR'S REPORT

To the Shareholders of  
Easy Asset Management AD  
ID Nr: 131576434  
Sofia, Bulgaria

### Report on the Audit of the Individual Financial Statements

#### Opinion

We have audited the individual financial statements of Easy Asset Management AD („the Company”), which comprise the individual statement of financial position as of December 31, 2024, and the individual statement of profit or loss and other comprehensive income, individual statement of changes in equity and individual cash flow statement for the year then ended, and notes to the individual financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying individual financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2024, and its financial performance and its cash flows for the year then ended in accordance with IFRS accounting standards adopted by the EU.

#### Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Individual Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Standards for Independence) (IESBA Code) together with the ethical requirements of the Law on Independent Financial Audit and Assurance on Sustainability (LIFAAS) that are relevant to our audit of the financial statements in Bulgaria, and we have fulfilled our other ethical responsibilities in accordance with the requirements of LIFAAS and IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

### *Impairment of Loans Granted*

As of December 31, 2024, the individual financial statements include:

- Gross value of microloans granted to individuals in the amount of BGN 106,593 thousand (December 31, 2023: BGN 93,563 thousand) and Expected credit loss in the amount of BGN 1,011 thousand (December 31, 2023: BGN 1,182 thousand), as presented in Note 12 to the individual financial statements;
- Gross value of individually significant loans granted in the amount of BGN 188,405 thousand (December 31, 2023: BGN 139,760 thousand) and Expected credit loss in the amount of BGN 10,807 thousand (December 31, 2023: BGN 10,222 thousand), as presented in Note 13 to the individual financial statements;
- Impairment loss of financial assets, recognized in the individual statement for comprehensive income, in the amount of BGN 1,758 thousand (2023: BGN 1,741 thousand), as presented in Note 7 to the individual financial statements.

See also the following notes to the individual financial statements:

- 2.4 Financial Instruments
- 25.A Credit Risk

| <b>Key Audit Matter</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | <b>How this key audit matter was addressed in our audit</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>The impairment represents a significant management judgment regarding the losses incurred within the Company's credit portfolio. Management evaluates the need for loan impairment on an individual and portfolio basis.</p> <p>The loans granted represent a significant part (82%) of the Company's total assets as of December 31, 2024. The Company applies an impairment model based on expected credit losses (ECL) in accordance with the requirements of IFRS 9 Financial Instruments.</p> <p>Determining the impairment of loans by applying this model involves the use of a significant level of judgment by the Company's Management, due to the high level of complexity</p> | <p>In this area, our audit procedures included:</p> <p>Gaining an understanding of the process of determining the ECL for loan impairment, including the models for calculating the ECL on a collective and individual basis.</p> <p>Evaluation of the adequacy of accounting policies and impairment methodology based on the requirements of IFRS 9 and our understanding of the Company's business.</p> <p>Inquiries to employees in the Company's risk management, internal audit and information technology departments in order to gain an understanding of the ECL calculation process, the IT applications used in it, the main data sources and the assumptions used in the ECL model.</p> |

| <b>Key Audit Matter</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | <b>How this key audit matter was addressed in our audit</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>in determining the amount of expected credit losses.</p> <p>Expected credit losses are calculated using available historical data and expected future developments. The statistical models used are based on the probability of default and the expected amount of loss given default.</p> <p>The key inputs used to measure ECL are: Probability of Default (PD); Loss Given Default (LGD); and Exposure to Default (EAD).</p> <p>Due to the materiality of the loans granted as an element of the Company's individual financial statements, as well as the high degree of inherent uncertainty in the approximate estimates of ECL, we have defined this matter as a key audit matter.</p> | <p>Gaining an understanding and evaluation of internal controls related to the determination of loans impairment.</p> <p>With respect to impairment calculated on a collective basis, we reviewed the methodology used by the Company to determine it, the reasonableness of the underlying assumptions and the completeness and accuracy of the input data.</p> <p>With respect to impairment calculated on an individual basis, for a risk-based sample of loans, a detailed review of credit files and an analysis of the assumptions and judgments used by the Company in determining the amount of expected future cash flows.</p> <p>Evaluation of the adequacy, completeness, and relevance of the Company's disclosures related to loan impairment losses.</p> |

#### **Information Other than the Individual Financial Statements and Auditor's Report Thereon**

Management is responsible for the other information. The other information comprises the Activity report and the Non-financial declaration prepared by management in accordance with Chapter Seven of the Accountancy Act, but does not include the individual financial statements and our auditor's report thereon.

Our opinion on the individual financial statements does not cover the other information and we do not express any form of assurance conclusion thereon, unless and to the extent explicitly specified in our report.

In connection with our audit of the individual financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the individual financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

## **Responsibilities of Management and Those Charged with Governance for the Individual Financial Statements**

Management is responsible for the preparation and fair presentation of the individual financial statements in accordance with IFRS accounting standards adopted by the EU and for such internal control as management determines is necessary to enable the preparation of individual financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the individual financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for the oversight of the Company's financial reporting process.

## **Auditor's Responsibilities for the Audit of the Individual Financial Statements**

Our objectives are to obtain reasonable assurance about whether the individual financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with LIFAAS and ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the individual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the individual financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our

auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure, and content of the individual financial statements, including the disclosures, and whether the individual financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## **Report on Other Legal and Regulatory Requirements**

### ***Additional Matters to be Reported under the Accountancy Act***

In addition to our responsibilities and reporting in accordance with ISAs, in relation to the Activity report and the Non-financial declaration, we have also performed the procedures added to those required under ISAs in accordance with the "Guidelines on new and extended audit reports and communication by the auditor" of the professional organization of certified public accountants and registered auditors in Bulgaria, the Institute of Certified Public Accountants (ICPA). These procedures refer to testing the existence, form and content of this other information to assist us in forming a position about whether the other information includes the disclosures and reporting provided for in Chapter Seven of the Accountancy Act applicable in Bulgaria.

### ***Position regarding Art. 37, paragraph 6 of the Accountancy Act***

Based on the procedures performed our position is that:

- The information included in the Activity report and the Non-financial declaration referring to the financial year for which the individual financial statements have been prepared is consistent with those individual financial statements.
- The Activity report has been prepared in accordance with the requirements of Chapter Seven of the Accountancy Act.
- The Non-financial declaration has been prepared in accordance with the requirements of Chapter Seven of the Accountancy Act.

**Reporting in accordance with Art. 10 of Regulation (EU) No 537/2014 in connection with the requirements of Art. 59 of the Law on Independent Financial Audit and Assurance on Sustainability**

In accordance with the requirements of the Law on Independent Financial Audit and Assurance on Sustainability (LIFAAS) in connection with Art. 10 of Regulation (EU) No 537/2014, we hereby additionally report the information stated below.

- MGI Delta LLC was appointed as a statutory auditor of the financial statements of Easy Asset Management AD („the Company”) for the year ended 31 December 2024 by the general meeting of shareholders held on 24 September 2024 for a period of one year.
- The audit of the financial statements of the Company for the year ended 31 December 2024 represents fourth total uninterrupted statutory audit engagement for that entity carried out by us.
- We hereby confirm that the audit opinion expressed by us is consistent with the additional report, provided to Company's audit committee, in compliance with the requirements of Art. 60 of the LIFAAS.
- We hereby confirm that we have not provided the prohibited non-audit services referred to in Art. 64 of the LIFAAS.
- We hereby confirm that in conducting the audit we have remained independent of the Company.

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

## **1. General information**

### **1.1. Legal status**

"EASY ASSET MANAGEMENT" AD (the "Company") is a joint-stock company established on December 8, 2005, operating in Bulgaria, UIC 131576434. The headquarters and address of the Company's management are: 28 Jawaharlal Nehru Blvd., Sofia, Bulgaria. The company is managed by a Board of Directors, which consists of:

- Stanimir Svetoslavov Vasilev – Chairman of the Board of Directors;
- Nedelcho Yordanov Spasov – Member of the Board of Directors;
- Ivelina Tsankova Kavurska – Member of the Board of Directors;
- Galin Todorov Todorov – Member of the Board of Directors and Executive Director;
- Angel Vasilev Madzhirov – Member of the Board of Directors and Executive Director.

The Company is represented jointly and separately by Galin Todorov Todorov and Angel Vasilev Madzhirov – Executive Directors.

The share capital was not increased during the year. The number of issued ordinary shares is 8,503,000 with a nominal value of BGN 1, amounting to a total share capital of BGN 8,503 thousand as of December 31, 2024. Each ordinary share gives the right to vote in the General Meeting of Shareholders, the right to a dividend and liquidation share. Each share gives the right to one vote. The right to a dividend and a liquidation share is determined in proportion to the nominal value of the share. The company can buy back its shares under the conditions and order provided by law.

### **1.2. Main activities**

"Easy Asset Management" EAD is a non-banking financial institution, with a focus in the field of microcredit and uses the trademark Easy Credit. The company provides small unsecured short-term loans to customers with low or moderate incomes. The company carries out its activity through a wide distribution network, which consists of almost 200 offices in the country. As of December 31, 2024, the total number of employees on an employment contract amounted to 1,619 people (as of December 31, 2023: 1,559 people).

The company has the following investments in subsidiaries:

- Easy Credit LLC (Ukraine) – 100%
- SC Easy Asset Management IFN AD (Romania) – 100% (99.999938 %)
- Ai Credit SP.Z.O.O. (Poland) – 100%
- Easy Payment Services OOD (Bulgaria) – 99.60%
- Financial Bulgaria EOOD – 100%
- A.D.P.K Easy Individual Solutions F.D.M.D. (Mexico) – 98%
- M Cash Macedonia DOOEL Skopje (North Macedonia) – 100%
- Easy Asset Management d.o.o. (Croatia) – 50%
- Easy Asset Management Iberia SL (Spain) – 100%
- Access Finance Sp z.o.o. (Poland) – 100%

In accordance with the requirements of IFRS 10 "Consolidated Financial Statements", the Company also prepares a consolidated financial statement.

The ultimate parent company, which compiles a consolidated financial statement for the largest group of enterprises in which the Company is included, is "Management Financial Group" EAD.

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

## **2. Accounting policy**

The main accounting policies applied in the preparation of this Individual Financial Statement are set out below. These policies have been consistently applied for all reporting periods presented, unless otherwise stated.

The individual financial statement includes: statement of comprehensive income for the year, statement of financial position as of December 31, statement of changes in equity for the year, statement of cash flows for the year and explanatory notes thereto. It has been prepared in compliance with the historical cost principle, with the exception of items in the statement of financial position requiring presentation at fair value in accordance with applicable accounting standards. The Company classifies its expenses according to their nature.

### **2.1. Basis for preparing the individual financial statement**

These financial statements have been prepared, in all material respects, in accordance with IFRS accounting standards as adopted by the European Union ("IFRS accounting standards as adopted by the EU"). The reporting framework "IFRS accounting standards as adopted by the EU" essentially represents the national accounting basis defined as the International Accounting Standards (IAS) adopted by the EU, as regulated by the Accounting Act and specified in item 8 of its Supplementary Provisions.

#### **2.1.1 Comparative data**

The Company has decided to present comparative information in its financial statements for a previous period.

When, for the purposes of a more reliable presentation of the reporting objects and operations, it is necessary to make changes in their classification and their presentation as separate components of the financial statement, the comparative data for the previous year are reclassified in order to achieve comparability with the current reporting period. In the event of a change in accounting policy, correction of an error from a previous period or a change in the presentation of financial information, the correction is reflected with retroactive effect and the Company presents an additional report on the financial position at the beginning of the comparative period.

#### **2.1.2 Going concern principle**

These Individual Financial Statements have been prepared on the basis of the going concern principle. As of the date of preparation of the individual financial statements, management has made an valuation of the Company's ability to continue as a going concern, taking into account all available information for the foreseeable future, which is at least, but not limited to twelve months from the date of the statement of financial position.

#### **2.1.3 Degree of liquidity and maturity structure**

The company presents its individual financial statement generally by degree of liquidity. An analysis of the settlement of liabilities is presented in Note 25.B.2. An analysis of the recovery of assets or settlement of liabilities within twelve months after the reporting date of the individual statement of financial position (current) and more than twelve months after the reporting date of the individual statement of financial position (non-current) is presented in the notes to the individual financial statements.

#### **2.1.4 Changes in accounting policy and errors**

The Company accounts for changes in accounting policy retroactively, adjusting the opening balance of each affected item of capital for the previous presented period, as well as other comparative amounts disclosed in the previous presented period, as if the newly adopted accounting policy had always been applied.

The Company retroactively corrects material errors from previous periods by recalculating the comparative amounts for the presented previous period in which the error occurred.

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

## **2.1.5 New Standards and Clarifications**

### *New and amended standards that came into force during the current reporting period*

The Company is applying for the first time the following standards and amendments, which are effective for annual periods beginning on or after January 1, 2024

- **Amendments to IFRS 16 - Lease Obligation on Sale and Leasebacks.** Clarifies the requirements that a seller-lessee uses when measuring the lease liability arising in a sale and leaseback transaction to ensure that the seller-lessee does not recognize any portion of the gain or loss that relates to the right-of-use that it retains.
- **Amendments to IAS 1 - Classification of liabilities as current or non-current.** Clarifies the requirements for classifying liabilities as current or non-current.
- **Amendments to IAS 7 and IFRS 7 - Supplier financing arrangements.** Clarifies the characteristics of supplier financing arrangements and requires additional disclosure of such arrangements.

### *Standards and amendments to existing standards issued by the IASB and adopted by the EU, which have not yet entered into force*

As of the date of approval of these financial statements, the following new standards issued by the IASB and adopted by the EU have not yet entered into force:

- **Amendments to IAS 21 The Effects of Changes in Foreign Exchange Rates - Non-convertibility.** The amendments clarify how to assess whether a currency is convertible and how to determine the exchange rate when it is not.

### *New standards and amendments to existing standards issued by the IASB that have not yet been adopted by the EU*

The following new and amended standards have not yet been approved for use in the EU and therefore cannot be applied by the Company:

- **IFRS 18 Presentation and Disclosure in Financial Statements.** The version issued by the IASB is effective for annual periods beginning on or after January 1, 2027, with earlier application permitted.
- **IFRS 19 Non-Publicly Reporting Subsidiaries: Disclosures.** The version issued by the IASB is effective for annual periods beginning on or after January 1, 2027, with earlier application permitted.
- **Amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures - Changes in the Classification and Measurement of Financial Instruments.** The version issued by the IASB is effective for annual periods beginning on or after January 1, 2026, with earlier application permitted.
- **Amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures - Contracts involving nature-dependent electricity.** The version issued by the IASB is effective for annual periods beginning on or after January 1, 2026, with earlier application permitted.
- **Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures – Sale or Contribution of Assets between an Investor and its Associate or Joint Venture.** The effective date was temporarily removed by the IASB.
- **Annual Improvements to IFRSs - Volume 11.** The version issued by the IASB is effective for annual periods beginning on or after January 1, 2026.

The Company expects that the adoption of these new standards and amendments to existing standards will not have a material effect on the Company's financial statements in the period of their initial application.

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

(All amounts are in BGN'000, unless otherwise stated)

## **2.2 Functional currency and recognition of exchange differences**

### *(a) Functional currency and presentation currency*

The individual elements of the Company's financial statements are valued in the currency of the main economic environment in which the company operates ("functional currency"). The individual financial statement is presented in thousand Bulgarian leva, which is the functional and presentation currency.

The Bulgarian lev is pegged to the euro (EUR) by means of the currency board mechanism introduced in the Republic of Bulgaria on January 1, 1999.

### *(b) Transactions and Balances*

Transactions in foreign currency are transformed into functional currency, applying the official exchange rate of the Bulgarian National Bank for the relevant day. Gains and losses from changes in exchange rates arising as a result of payments for transactions in foreign currency, as well as from revaluation at the closing exchange rate of assets and liabilities denominated in foreign currency are recognized in the income statement.

The gain and loss from foreign currency transactions that relate to receivables and cash are presented in the income statement as "finance income or expense". All other gains and losses are presented in the income statement as 'other (losses)/gains - net.

Monetary assets and liabilities in foreign currency are reported at the closing exchange rate of the BNB as of the reporting date.

Significant exchange rates:

|                         | <b>December 31<br/>2024<br/>BGN</b> | <b>December 31<br/>2023<br/>BGN</b> |
|-------------------------|-------------------------------------|-------------------------------------|
| 1 US dollar is equal to | 1.88260                             | 1.76998                             |
| 1 euro is equal to      | 1.95583                             | 1.95583                             |

## **2.3 Recognition of income and expenses**

### *Interest income and expense*

For all financial instruments reported at amortized cost, interest-bearing financial assets classified as available-for-sale and financial instruments reported at fair value, interest income and expenses are reported as "interest income" and "interest expense" in the financial statement, using the effective interest method. It is a method of calculating the amortized cost of a financial asset or financial liability and allocating the interest income or interest expense for the relevant period. The effective interest rate is the interest rate that accurately discounts the estimated future cash flows for the life cycle of the financial instrument, or when necessary – a shorter period, relative to the net carrying amount of the financial asset or financial liability.

In calculating the effective interest rate, the Company estimates cash flows that take into account all contractual terms of the financial instrument (eg prepayment options), but does not take into account future credit losses. The calculation includes all fees and commissions paid or received between the parties to the contract that form an integral part of the effective interest rate, transaction expenses and all other premiums and discounts given or received.

### *Income from and expenses for fees and commissions*

Revenues from fees and commissions are accrued at the time the service is rendered. Fees received for providing services for a specified period of time are accrued within that period of time. Revenues from fees for provided guarantees are recognized according to the validity period of the issued guarantee. Fees for loan commitments that are most likely to be withdrawn and other credit-related charges are deferred (together with any additional expenses) and recognized by changing the effective interest rate on the loan.

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

*Revenue from penalties*

Income from penalties and in the event of non-fulfillment of the contractual liabilities of borrowers under granted loans are recognized in proportion to the term of the loan. In cases of early repayment, the residual amount of the claim is recognized as income on the date of early repayment.

*Income from ceded receivables*

Revenues from ceded receivables represent amounts collected in excess of the carrying amount of the ceded receivable.

*Customer loyalty programs*

Loans granted under customer loyalty programs represent a separate identifiable component of the transaction under which they are granted. The fair value of the consideration received in respect of the initial sale is allocated between the loans and the other components of the transaction. Loans granted under loyalty programs are reported as an adjustment to the carrying amount of the loan portfolio and interest income for the period.

*Dividend income*

Dividend income is recognized when the right to receive payment arises.

*Revenue from contracts with customers*

The company recognizes revenue from contracts with customers, in accordance with the settlement of the performance obligation embedded in the contract, according to the rules of IFRS 15 Revenue from contracts with customers, namely:

- if the performance obligation is satisfied at a specific point in time ("point in time"), the related revenue is recognized in profit or loss when the service is provided,
- if the performance obligation is satisfied over time, the related revenue is recognized in profit or loss to reflect the progress of the performance of such liability.

To determine whether and how to recognize revenue, the Company uses the following 5 steps:

1. Identifying the contract with a customer
2. Identification of performance obligations
3. Determining the price of the transaction
4. Allocation of transaction price to performance obligations
5. Revenue recognition when performance obligations are satisfied.

Operating expenses are recognized in profit or loss when the services are used or on the date they are incurred.

## **2.4 Financial Instruments**

*Classification*

According to IFRS 9 Financial Instruments, the Company classifies financial assets based on the financial asset management business model and the contractual cash flow characteristics of the financial asset as (1) measured at amortized cost, (2) measured at fair value through other comprehensive income and (3) measured at fair value in profit or loss.

A financial asset is classified as measured at amortized cost if the following conditions are met:

- The financial asset is held within a business model that aims to collect the agreed cash flows, and
- The contractual terms of the financial asset give rise, on certain dates, to cash flows that are only payments of principal and interest on the principal balance.

Financial assets in the Amortized cost category comprise debt instruments (loans granted) whose business model is held to collect cash flows. The business model may be such that the assets are held for the purpose of collecting the contractual cash flows even if the Company sells the financial assets when there is an increase in the credit

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

risk of the asset. In order to determine whether there is an increase in the credit risk of the assets, the Company takes into account all reasonable and reasoned information, including the estimated one. Regardless of their frequency and value, sales driven by an increase in the credit risk of the assets are not incompatible with a business model whose objective is to hold financial assets to collect contractual cash flows, as the credit quality of the financial assets is relevant on the Company's ability to collect contractual cash flows. The business model used by the Company in relation to loans granted is "held for collection". The company sells a financial asset when the asset's credit risk is increased, which is not inconsistent with this model.

A financial asset is classified as measured at fair value through other comprehensive income if the following conditions are met:

- The financial asset is held within a business model whose purpose is to collect the contractual cash flows and sell, and
- The contractual terms of the financial asset give rise to payments on specified dates of cash flows that are only payments of principal and interest on the principal balance.

A financial asset is classified as measured at fair value through profit and loss if it is not measured at amortized cost or fair value through other comprehensive income.

*Initial recognition*

The Company recognizes a financial asset or a financial liability in the statement of financial position when it becomes a party to a financial instrument contract. When the Company initially recognizes a financial asset or liability, it classifies and measures it in accordance with the requirements of IFRS 9 mentioned above.

The trade date is the date on which the Company undertakes to buy or sell a financial asset or financial liability. In terms of reporting, the trade date refers to (a) the recognition of the asset to be received or the liability to be paid on the trade date, and (b) the write-off of the asset that has been sold, the recognition of gains and losses on sale and recognition of a receivable from the buyer upon payment on the trade date.

Transaction expenses include intrinsic expenses directly related to the acquisition, issuance or sale of a financial asset or liability. An intrinsic expense is that expense that would not have been incurred if the Company had not acquired, issued or sold a given financial instrument. These expenses include fees and commissions paid to brokers, consultants and dealers, fees to regulatory agencies and stock exchanges, and transfer taxes and fees. Transaction expenses do not include debt securities premiums or discounts, financing expenses or internal administrative expenses, or holding expenses.

Financial liabilities are initially recognized at fair value, which represents the issuance proceeds (the fair value of the consideration received) net of transaction expenses, when material. Subsequently, they are presented at amortized cost and any difference between the net proceeds and the redemption value is recognized in profit or loss over the period of the loan using the effective interest method.

*Subsequent valuation*

After initial recognition, the Company values the financial instrument by:

- amortized cost; or
- fair value through other comprehensive income; or
- fair value through profit or loss.

Amortized cost is equal to:

- the value at which the financial asset was measured at initial recognition
- minus the principal repayments
- plus or minus the cumulative amortization using the effective interest rate method of any difference between that initial amount and the maturity amount, adjusted for impairment loss.

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

When applying the effective interest rate method, the Company identifies the fees that are an integral part of the effective interest rate of a financial instrument. Fees that are an integral part of the effective interest rate of a financial instrument shall be treated as an adjustment to the effective interest rate, unless the financial instrument is measured at fair value, the change in fair value being recognized in profit or loss. In such cases, fees shall be recognized as income or expense upon initial recognition of the instrument.

*Fair value measurement*

Fair value is the price received for the sale of an asset or paid for the transfer of a liability in an ordinary transaction between market participants at the measurement date (in the principal or most advantageous market) under market conditions (i.e., exit price) whether or not the price can be directly observed or determined by other methods of estimation.

In order to improve consistency and comparability in the measurement of fair value and related disclosures, the Company complies with IFRS 13, which defines a fair value hierarchy that categorizes into three levels the inputs used in valuation methods used to measure fair value. The fair value hierarchy gives the highest priority to (unadjusted) quoted prices in active markets for identical assets or liabilities (level 1 inputs) and the lowest priority to unobservable inputs (level 3 inputs).

*Impairment*

At each reporting date, the Company estimates the impairment loss for a financial instrument at a value equal to the expected credit losses over the entire term of the instrument, if the credit risk of the financial instrument has increased significantly since initial recognition. If the credit risk of the financial instrument has not increased significantly from initial recognition, the Company estimates the impairment loss for the financial instrument at a value equal to the expected credit losses for 12 months. If the Company has measured the impairment loss for a financial instrument at a value that is equal to the expected credit losses over the entire term of the instrument in previous reporting periods, but determines that the requirements for the expected credit losses for the entire term of the instrument are no longer met in the current reporting period, the Company shall measure the impairment loss at a value that is equal to the expected credit losses for 12 months as of the current reporting period. The Company recognizes as impairment profit or loss in the income statement the amount of expected credit losses (or reversal) that is required to be adjusted for impairment loss at the reporting date.

Impairment loss is equal to the expected credit losses for 12 months (stage 1), if there is no significant increase in the credit risk as of the reporting date since initial recognition. Impairment loss is equal to the expected credit losses over the life of the instrument, if there is a significant increase in the credit risk as of the reporting date since initial recognition (stage 2) or if there is a default of the asset since initial recognition (stage 3). The transaction is always in stage 1 as of the initial date. Financial instruments with a maturity of less than 12 months are allocated to stage 1 or stage 2, but the relevant expected credit losses shall always be calculated taking into account the lifetime of the instrument that is less than 12 months - stage 1.

In accordance with the general approach, the criterion for transferring from one stage to another is symmetrical at transaction level. In particular, if in subsequent reporting periods the credit risk quality of the financial asset allocated to stage 2 improves and there is no longer a significant increase in credit risk since initial recognition, then the asset is allocated to stage 1.

The criterion for recognizing an impairment loss equal to the expected credit losses over the life of the instrument could, in some cases, be based only on quality information or only on quantitative information. In other cases, quality information and quantitative information shall also be taken into account to determine the transfer criterion.

*Impairment of receivables from individually significant loans granted*

The Company applies the general approach of IFRS 9 for measuring expected credit losses on receivables from individually significant loans granted.

Expected credit losses are calculated on the date of each reporting period.

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

Valuation of receivables under granted individually significant loans for the purposes of risk management is a process that requires the use of models that reflect the impact on the exposure of changes in market conditions and the debtor's activity, expected cash flows and time to maturity. The valuation of the credit risk of individually significant loans granted leads to further judgments about the probability of default, the loss ratios associated with these judgments and the correlations between counterparties. The Company measures credit risk using probability of default (PD), exposure given default (EAD) and loss given default (LGD).

To determine the credit risk of individually significant loans granted, the company's management has developed a methodology that includes two main components: determining the debtor's credit rating, and statistical models for calculating marginal PD by year for each rating. Regarding the rating, management uses internal valuations of the credit rating of individual debtors based on global methodologies of leading global rating agencies. The rating reflects financial ratios of leverage, liquidity, profitability, etc., quantitative (eg sales levels) and qualitative (eg financial policy, diversification, etc.) criteria according to the relevant methodology and industry.

Through statistical models based on historical global data on probabilities of default (PD) and transitions between different ratings, as well as on forecasts of key macroeconomic indicators (GDP growth, inflation, etc.), the required marginal PDs by year are determined for each rating.

Based on the established specific rating and the analysis of the characteristics of the debtor, including the changes that have occurred in them compared to the previous period, the stage of the instrument is determined (Stage 1, Stage 2 or Stage 3). The Company considers that a financial instrument has experienced a significant increase in credit risk when one or more of the following criteria are met:

*(a) Quantitative criteria*

- Increase in the lifetime probability of default (PD) of the financial asset at the reporting date compared to the lifetime probability of default at the date the asset was first recognized in the amount of 30%;
- The debtor is in arrears for more than 180 days, but less than 365 days, except for cases where the credit period could reach up to and over 2 years due to the financial specifics of the debtor;
- Actual or expected significant adverse changes in the debtor's operating results, above the permissible range, as measured by the debtor's key financial and operational indicators.

*(6) Qualitative criteria:*

- Significant adverse changes in business, financial and/or economic conditions in which the debtor operates;
- Actual or expected significant adverse changes in the debtor's operating results;
- Early signs of cash flow / liquidity problems, such as delays in payments on trade payables / bank loans;

The criteria used to determine a significant increase in credit risk are monitored and reviewed periodically for appropriateness by the company's management.

The Company defines a financial instrument in default and with an incurred credit loss when it meets one or more of the following criteria:

*(a) Quantitative criteria*

- The debtor is more than 365 days in arrears on his contractual payments, except for cases where the credit period could reach up to and over 2 years due to the financial specifics of the debtor;
- Occurred or imminent material adverse changes and events in the debtor's business, financial conditions and economic environment, measured by a serious decline in the debtor's main financial and operational indicators;
- The debtor reports a series of losses and negative net assets;

*- Qualitative criteria:*

The debtor is unable to pay due to significant financial difficulties. These are cases when:

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

(All amounts are in BGN'000, unless otherwise stated)

- The debtor is in breach of the financial contract, e.g. interest payments, collateral and/or other essential contract, incl. and for financing;
- Adverse changes in the debtor's business, market, environment and regulations;
- Discounts and reliefs made in connection with the debtor's financial difficulties;
- It is likely that the debtor will be declared bankrupt.

The definition of default is consistently applied to model probability of default (PD), exposure given default (EAD) and loss given default (LGD) throughout the company's expected loss calculations.

Expected credit losses are calculated by discounting the resulting value from the product of: probability of default (PD), exposure at default (EAD) and loss given default (LGD), defined as follows:

- PD represents the probability that the obligor will not fulfill its financial liability either in the next 12 months or during the lifetime of the financial asset (lifetime PD), determined on the basis of public data on PD of generally accepted sources and statistical models for the effects of predictable macroeconomic factors. Also, the company's management has performed a historical analysis and identified the main economic variables affecting the credit risk and expected credit losses for each individually significant loan receivable.
- EAD is the amount owed to the company by the debtor at the time of default, during the next 12 months or during the residual period of the claim, determined according to the specific characteristics of the instrument (amount owed, repayment plans, interest, term, etc.).
- LGD represents the company's expectation of the amount of loss given an exposure in default. LGD varies according to the type of debtor, the type and seniority of the claim and the availability of collateral or other credit support. LGD is measured as a percentage loss for the amount of the claim at the time of default.

The discount rate used in calculating the expected credit loss (ECL) is the original effective interest rate on the instrument.

The categorization used by the company to assess the credit risk associated with receivables from individually significant loans is as follows:

| Category                | Description                                                                                                   | Basis for recognition of expected credit losses       |
|-------------------------|---------------------------------------------------------------------------------------------------------------|-------------------------------------------------------|
| Performing<br>(Stage 1) | The debtor has a low risk of default and no overdue payments                                                  | 12-month expected credit losses                       |
| Doubtful<br>(Stage 2)   | Amounts overdue for more than 180 days or a material increase in credit risk compared to initially recognized | Expected credit losses over the lifetime of the asset |
| In default<br>(Stage 3) | Amounts overdue for more than 2 years or evidence that the asset is credit-impaired                           | Expected credit losses over the lifetime of the asset |

#### *Financial liabilities*

This category includes loans from banks, related parties and P2P investors. After their initial recognition, interest-bearing loans and borrowed funds are valued at amortized cost using the effective interest rate method. Gains and losses are recognized in profit or loss when the liabilities are written off and through the amortization process using the effective interest rate method.

#### *Loans from P2P investors*

The company has signed a cooperation agreement with an operator of a peer-to-peer (P2P) investment internet platform, regulated according to the legal framework of the Republic of Estonia. The purpose of the cooperation agreement is to attract funding through the P2P platform.

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

The P2P platform enables individual and corporate investors to receive proportional interest cash flows and principal cash flows from debt instruments (receivables under granted microloans to individuals) issued by the Company in exchange for an advance payment. These rights are established through transfer agreements between the investors and the P2P platform, which acts as an agent on behalf of the Company. The investor can choose what part of the loan to invest in, with the maximum threshold being up to 70% of the principal. The Company must pay the investor the pro rata share of the funding raised for each debt instrument under the terms of the relevant individual agreement with the Company's client.

Transfer agreements are agreements (assignments) with the right of recourse, which require the Company to guarantee the full payment of the remaining part of the investor's principal in the event of a default of more than 60 days by the Company's client (repurchase guarantee). Transfers with rights of recourse provide direct recourse to the Company, thus not qualifying as pass-through arrangements in accordance with IFRS 9. In particular, neither the investors nor the P2P platform bear any risks related to the creditworthiness of the Company's client. In practice, the Company retains the risks and benefits of ownership of the financial asset. Therefore, these debt instruments of the Company do not meet the conditions for consideration for a partial write-off, therefore the Company does not write off the loans transferred through the P2P platform from the statement of financial position. On the other hand, liabilities to investors are recognized in the statement of financial position as liabilities for Borrowings.

Liabilities arising from assignments with right of recourse are initially recognized at cost, which represents the fair value of the consideration received from the investors. After initial recognition, financing raised through a P2P platform is subsequently measured at amortized cost using the effective interest method. The amortized cost is calculated taking into account all issue expenses and any settlement discount or premium. Gains and losses are recognized in profit and loss as interest income/expense when liabilities are written off. Interest expense paid to investors is shown in a gross amount calculated using the effective interest method in the Interest expense item of the Statement of Comprehensive Income.

*Offsetting financial instruments*

Financial assets and liabilities are offset and the net amount reported in the statement of financial position only when the Company has a legal right to offset the recognized amounts and intends to settle the asset and liability on a net basis, or to realize the asset and settle the liability simultaneously .

## **2.5 Cash and cash equivalents**

Cash and cash equivalents shown in the statement of cash flows include cash, checking accounts and bank deposits with an initial maturity of at least three months.

## **2.6. Property, plant and equipment**

*Initial measurement*

At their initial acquisition, property, machinery, equipment and equipment (fixed tangible assets) are valued at the acquisition price (cost), which includes the purchase price, incl. customs fees and all direct expenses necessary to bring the asset into working order. Direct expenses are: site preparation costs, initial delivery and handling costs, installation costs, project-related fees costs , non-refundable taxes, etc. The company has determined a value threshold of BGN 700, below which the acquired assets, regardless of the fact that they have the characteristics of a long-term asset, are treated as a current expense at the time of their acquisition.

*Subsequent measurement*

The approach chosen by the Company for the subsequent evaluation of tangible fixed assets is the cost model according to IAS 16 Property, plant and equipment - the acquisition price (cost), reduced by accrued depreciation and accumulated impairment losses.

*Depreciation methods*

The Company uses the straight-line method of depreciation of fixed tangible assets. Land does not depreciate. The

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

useful lives of asset groups are determined in accordance with physical wear and tear, the specifics of the equipment, future intentions of use and assumed moral obsolescence.

The useful life by asset group is as follows:

- Buildings 25 years
- Equipment 25 years
- Computers and peripherals 2 years
- Cars 4 years
- Office furniture 6-7 years

The useful life of fixed tangible assets is reviewed at the end of each year, and if significant deviations are found from the future expectations for the period of use of the assets, the same is adjusted prospectively.

*Subsequent expenses*

Repairs and maintenance expenses are recognized as current in the period in which they are incurred. Subsequent expenses incurred related to fixed tangible assets, which have the nature of replacement of certain nodal parts or of remodeling and reconstruction, are capitalized to the carrying amount of the relevant asset and its remaining useful life is reviewed as of the date of capitalization. At the same time, the unamortized part of the replaced components is written off from the carrying amount of the assets and recognized in the current expenses for the period of the reconstruction.

*Impairment of assets*

The carrying amounts of property, plant and equipment are subject to review for impairment when events or changes in circumstances occur that indicate they could be permanently different from their recoverable amount. If such indicators are present, an impairment test is made and if the recoverable amount is lower than their carrying amount, the latter is reduced to the recoverable amount of the assets. The recoverable amount of property, plant and equipment is the higher of fair value less costs to sell or value in use. To determine the value in use of assets, future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market conditions and valuations of the time value of money and risks specific to the asset in question. Impairment losses are reported in the statement of comprehensive income.

*Gains and losses on sale*

Fixed tangible assets are written off from the statement of financial position when they are permanently removed from use and no future economic benefits are expected from them or they are sold. Gains or losses on sales of individual assets are determined by comparing the proceeds from the sale and the carrying amount of the asset at the date of sale. They are stated net, in "Other operating income" to the statement of comprehensive income.

## **2.7 Intangible Assets**

Intangible assets are presented in the financial statements at acquisition cost (cost), less accumulated amortization and impairment losses.

The Company applies the straight-line method of amortization of intangible assets with a specified useful life of 2 years.

The carrying amount of intangible assets is subject to review for impairment when events or changes in circumstances occur that indicate that the carrying amount of the assets could exceed their recoverable amount. The impairment is then included as an expense in the statement of comprehensive income (in profit or loss for the year).

Expenses related to the maintenance of intangible assets are capitalized only when the future economic benefit of the asset increases. All other expenses are recognized in the statement of comprehensive income (in profit or loss for the year).

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

Intangible assets are derecognized from the Statement of Financial Position when they are permanently withdrawn from use and no future economic benefits are expected from their disposal or they are sold.

Gain or loss on sale of individual intangible assets is determined by comparing revenues from their sale and their carrying amount at the date of sale. They are recognized net in 'Other operating income/(loss)' in the Statement of Comprehensive Income (in profit or loss for the year).

## **2.8 Investments in Subsidiaries**

Long-term investments representing shares in subsidiaries are presented in the financial statements at acquisition price (cost), which represents the fair value of the consideration paid, including the direct expenses of acquiring the investment, less accumulated impairment.

Investments in subsidiaries held by the Company are subject to impairment review. When impairment conditions are established, it is recognized in the statement of comprehensive income (in profit or loss for the year).

Investments in subsidiaries are written off when the rights arising from them are transferred to other persons when the legal grounds for this occur and thus control over the economic benefits of the relevant specific type of investment is lost. The gain or loss on their sale is presented under "finance income" or "finance expense" respectively in the statement of comprehensive income (in profit or loss for the period).

## **2.9 Investments in Joint Ventures**

A joint venture is an enterprise in which two or more parties have joint control. Joint control is a contractual sharing of control over an entity and exists only when decisions regarding the activities involved require the unanimous consent of the parties sharing control.

The Company recognizes its equity interest in the jointly controlled entity as an investment and accounts for this investment using the equity method. Under the equity method, an investment in a joint venture is initially recognized in the statement of financial position at cost and adjusted thereafter to recognize the Company's share of the profit or loss and other comprehensive income of the joint venture. When the Company's share of the losses of a joint venture exceeds the Company's share of that joint venture, the Company derecognizes its share of further losses. Additional losses are recognized only to the extent that the Company has assumed legal or constructive liabilities or made payments on behalf of the joint venture.

If there is objective evidence that the Company's net investment in a joint venture is impaired, the requirements of IAS 36 Impairment of Assets are applied to determine whether it is necessary to recognize an impairment loss in respect of the Company's investment. Any reintegration of this impairment loss is recognized in accordance with IAS 36 to the extent that the recoverable amount of the investment has subsequently increased.

## **2.10 Leasing**

At the lease commencement date, whichever is earlier - the date of the lease agreement or the date of the parties binding with the main terms and conditions of the lease agreement, the Company shall assess whether the agreement constitutes or contains a lease. An agreement constitutes or contains a lease, if by virtue of that agreement the right to control the use of an asset for a certain period of time is conveyed for consideration.

### *Lessee*

The Company applies a uniform model of recognition and valuation of all lease contracts, except for short-term lease contracts (a lease contract with a term of 12 months or less from the date of commencement of the lease and which does not contain a purchase option) and lease contracts of low value assets (such as tablets, personal computers, phones, office equipment and others).

The Company did not take advantage of the practical expedient of IFRS 16, which allows the lessee for each

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

class of identified asset not to separate the non-lease from the lease components, but instead to account for each lease component and related non-lease components as a separate lease component. For contracts that contain a lease of one or more lease and non-lease components, the Company applies a policy of allocating remuneration under contracts that contain lease and non-lease components based on the relative unit prices of the lease components and the aggregate unit price of the non-lease components.

*a) right-of-use assets*

The Company recognizes in the statement of financial position the asset "right of use" on the date of commencement of the lease contracts, i.e. the date on which the underlying asset is available for use by the Company.

Right-of-use assets are presented in the statement of financial position at acquisition cost less accumulated depreciation, impairment losses and adjustments due to revaluations and adjustments to the lease liability. The acquisition price includes:

- the amount of the initial valuation of the lease liabilities;
- lease payments made on or before the commencement date, less any incentives received under the lease agreements;
- the initial direct expenses incurred by the Company in its capacity as a lessee;
- recovery costs to be incurred by the Company for dismantling and removing the underlying asset, restoring the site on which the asset is located, or restoring the underlying asset to the condition required under the contract.

The Company shall depreciate the right-of-use asset to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. If ownership of the underlying asset is transferred under the lease agreement by the end of the lease term, it shall be depreciated over its useful life. Depreciation starts to accrue from the commencement date of the lease. The Company has chosen to apply the cost model for all right-of-use assets.

Right-of-use assets are tested for impairment as per IAS 36 Impairment of Assets, applying impairment measurement and reporting policy similar to that applied to property, plant and equipment. The recoverable amount of right-of-use assets is the higher of the fair value less disposal costs of an asset and its value in use. In measuring asset's value in use, future cash flows are discounted to their current value by using a pre-tax discount rate that reflects current market conditions and valuations of the time value of money and the risks specific to the asset. Impairment loss is defined as the difference between the recoverable amount and the carrying amount.

"Right-of-use" assets are presented in the individual statement of financial position, and their amortization - under General administrative and other operating expenses in the individual statement of comprehensive income.

*b) lease liabilities*

The Company recognizes lease liabilities on the lease inception date, measured at the present value of the lease payments outstanding at that date. They include:

- fixed payments (including substantially fixed lease payments) less lease incentives receivable;
- variable lease payments dependent on indices or rates initially assessed using the indices or rates on the lease inception date;
- the price for exercising the purchase option, if it is sufficiently certain that the lessee company will exercise this option;
- payments of penalties for termination of lease contracts, if the lease contract term reflects the exercise of an option to terminate the contract by the lessee company;
- the amounts the company expects to pay to lessors as residual value guarantees.

Variable lease payments that do not depend on indices or revaluations, but are related to performance or the

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

use of the underlying asset, are not included in the measurement of the lease liability and the right-of-use asset. They are recognized as a current expense in the period in which the event or circumstance giving rise to these payments occurs.

Lease payments are discounted at the interest rate embedded in the contract, if it can be directly determined, or at the differential interest rate the Company would pay if it borrowed funds necessary to obtain an asset of similar value to the asset "right of use", for a similar period of time, with similar collateral and in a similar economic environment.

Lease payments (installments) contain, in a certain ratio, the financial expense (interest) and the accrued part of the lease liability (principal). Lease interest expense is presented in the statement of comprehensive income (in profit or loss for the year) of the Company over the term of the lease on a periodic basis so as to achieve a constant interest rate on the remaining outstanding principal of the lease liability by presenting as "financial expenses".

Lease liabilities are presented on a separate line in the individual statement of financial position: "Lease liabilities"

The Company subsequently assesses the lease liability as:

- increases the carrying amount to reflect the interest on the lease liabilities;
- reduces the carrying amount to reflect the lease payments made;
- revalues the carrying amount of lease liabilities to reflect revaluations or lease amendments;
- residual value guarantees are reviewed and adjusted as necessary at the end of each reporting period.

The Company remeasure its lease liabilities (in which it also makes corresponding entries to the relevant "right-of-use" assets) when:

- there is a change in the term of the lease or an event or circumstance has occurred that results in a change in the valuation of the option to purchase whereby the adjusted lease liabilities are recalculated at an adjusted discount rate;
- there is a change in lease payments resulting from a change in an index or rate or there is a change in the amounts expected to be payable under residual value guarantees whereby the adjusted lease liabilities are recalculated at the unchanged (original) discount rate (except where the change in lease payments resulting from a change in floating interest rates, in which case an adjusted discount rate is used that reflects interest rate changes);
- the lease is amended and that amendment is not reflected as a separate lease, in which case the lease liability is recalculated based on the term of the amended lease, discounting the amended lease payments at the adjusted discount rate at the effective date of the amendment.

*c) Short-term leases and leases where the underlying asset is of low value*

The Company applies the exemption under IFRS 16 from the requirement to recognize a right-of-use asset and lease liability to its short-term leases of buildings and vehicles and to its leases of low-value assets representing printers and other devices, which the Company considers to be of low value as new and used independently in the Company without being dependent and closely related to other assets.

Payments related to short-term leases and leases where the underlying asset is of low value are recognized directly as a current expense in the statement of comprehensive income (in profit or loss for the year) on a straight-line basis over the lease term.

## **2.11 Income Taxes**

### *Current income taxes*

Current taxes on the Company's profit are determined in accordance with the requirements of the Bulgarian tax

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

legislation - the Law on Corporate Income Taxation. The nominal income tax rate for 2024 is 10% (2023: 10%).

*Deferred income taxes*

Deferred income taxes are determined using the balance sheet method on all temporary differences as of the financial statements date, between the carrying amounts of the assets and liabilities and their tax bases. A deferred tax liability is recognized for all taxable temporary differences.

Deferred tax assets are recognized for all deductible temporary differences and the carryforward of unused tax losses, to the extent that it is probable they will reverse and a taxable profit will be available or taxable temporary differences might occur, against which these deductible temporary differences can be utilized, with the exception of the differences arising from the recognition of an asset or liability, which has affected neither the accounting nor taxable profit (loss) as of the transaction date.

The carrying amount of all deferred tax assets is reviewed at each reporting date and reduced to the extent that it is probable that they will reverse, and sufficient taxable profit will be generated or taxable temporary differences will occur in the same period, whereby they could be deducted.

Deferred taxes related to items directly recognized in equity or other as other components of comprehensive income, balance sheet item or other component of comprehensive income are also reported directly in the relevant equity component, balance sheet item, or other component of comprehensive income.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset will be realized, and the liabilities will be settled (repaid) on the basis of the tax laws that have been enacted or are expected to be enacted with a high degree of certainty.

As of 31 December 2024, the deferred tax assets and liabilities of the Company were measured at a rate of 10% (31 December 2023: 10%).

## **2.12 Employee Benefits**

*Short-term benefits*

Short-term employee benefits (other than employment termination benefits) include salaries, bonuses, compensation for unused leave, social and health insurance contributions.

The Company recognizes the estimated undiscounted amount of short-term personnel benefits as an expense in the period in which the personnel provided the services related to those benefits (regardless of the date of payment), corresponding to other liabilities in the statement.

The amount of short-term personnel income resulting from unused leave is calculated as the sum of each employee's unused days of paid leave multiplied by the daily rate of their gross salary.

*Long-term benefits*

The Company's liabilities arising from long-term employee benefits other than pension plans represent future benefits payable to employees in exchange for services rendered to the Company in the current or prior periods that are not due in full within 12 months from completion of service.

The Company has an established plan for additional pension insurance. According to the Labor Code, upon termination of the employment relationship, after the worker or employee has acquired the right to a pension for length of service and age, the Company is obliged to pay him compensation in the amount of twice the gross monthly remuneration on the date of termination of the employment relationship. In the event that the worker or employee has worked for the Company for the last 10 years, the amount of compensation amounts to six months' amount of his gross remuneration.

(All amounts are in BGN'000, unless otherwise stated)

### **2.13 Provisions**

Provisions are recognized when:

- The Company has a present liability (legal or constructive) as a result of past events;
- it is likely that an outflow of resources containing economic benefits will be required to repay it, and
- a reliable estimate of the amount of the liability can be made.

The amounts recognized as provisions represent the best estimate of the expenses required to settle the present liability. The risks and uncertainties inherent in the relevant events and circumstances are taken into account in order to make the best judgment about the provision.

In cases where there are multiple obligations of a similar nature, the likelihood of settlement is determined by considering those similar obligations in general. A provision is recognized even if the probability of payment of an individual liability from the group of similar liabilities is low. Provisions are discounted when the effect is material, in which case the amount of the provision represents the present value of the payments expected to be made to settle the liability. The discount rate is the pre-tax rate that reflects the current market valuation of timing differences in the value of money and liability-specific risks. The discount rate does not reflect risks for which future cash flows have already been recalculated. The increase in the provision due to the passage of time is recognized as interest expense.

During the next accounting period, the actual expenses incurred for the repayment of the current liability are reported not as a current expense, but as a reduction of the previously accrued provision. After the liability is settled in full, the unutilized portion of the provision, if any, is written off.

### **2.14 Equity**

Equity consists of the Company's registered share capital based on applicable legal provisions and articles of association. The nominal value of the Company's share capital is indicated in the amount specified in the articles of association and in the Commercial Register.

According to the requirements of the Commercial Law and the statutes, the Company is obliged to form a "reserve fund", as the sources of the fund can be:

- at least one-tenth of the profit, which is allocated until the funds in the fund reach one-tenth of the share capital or a larger part, determined by a decision of the General Meeting of Shareholders;
- the funds received above the nominal value of the shares upon their issuance (premium reserve);
- other sources provided for by decision of the General Meeting of Shareholders.

The funds from the fund can only be used to cover the annual loss and losses from previous years. When the funds in the fund reach the minimum amount defined in the articles of association, the funds above this amount can be used to increase the share capital.

Retained earnings includes net profit (loss) for the year recognized in the statement of comprehensive income and accumulated profits (losses) from prior years.

### **2.15 Distribution of Dividends**

The distribution of dividends to the Company's shareholders is recognized as a liability in the Company's financial statements in the period in which it is approved by the Company's shareholders.

### **2.16 Related Parties**

For the purposes of this financial statement, the Company presents as related parties the parent company, its subsidiaries and associated companies, the members of key management personnel, as well as close members of

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**

---

(All amounts are in BGN'000, unless otherwise stated)

their families, and the companies controlled by all the above-mentioned persons.

## **2.17 Share-Based Payments**

The Company's personnel receive share-based compensation, with employees providing services in exchange for compensation received in the form of equity instruments. Share-related transaction expense is recognized together with a corresponding increase in capital over the period during which the performance and/or service conditions are met, as of the date the relevant employees become fully entitled to receive them ("vesting date of rights"). The cumulative expense recognized for share-related transactions for each reporting date through the vesting date reflects the extent to which the vesting period has expired and the Company's best judgment as to the number of equity instruments that will ultimately rights are acquired. The expense is stated as "Personnel Expense". In cases where the terms of share-based payments are amended, the minimum expenses recognized in Personnel Expenses are the expenses as they would have been if the terms had not been changed. An additional expense is recognized for any modifications that increase the total value of the share-based payment arrangement or otherwise benefit the employee. In cases where share-based payments are cancelled, the cancellation is treated as a vested right from the date of cancellation and any expense not yet recognized by the date of cancellation is recognized immediately.

If a new program is introduced in place of an old stock pay program, the canceled and new programs are treated as if they were a modification of the original program as described above.

Share-based payment expense is measured initially at fair value using a pricing model, taking into account the terms under which the instruments are granted. This fair value is reported as an expense over the vesting period. The program liability is remeasured to fair value in each statement of financial position up to and including the settlement date, with changes in fair value reported in the statement of comprehensive income.

## **2.18 Treasury Shares Repurchased and Treasury Share Contracts**

The Company's own capital instruments, which are acquired by it or its subsidiaries (the company's own shares), are deducted from the capital, being accounted for at the weighted average cost of acquisition. The consideration paid or received for the purchase, sale, issuance or cancellation of the Company's own equity instruments is recognized directly in equity. Gains or losses are not recognized in the statement of comprehensive income.

Treasury share contracts that relate to the issuance of treasury shares for consideration are classified as equity and are added to or deducted from equity. Contracts for own shares that require a net cash settlement or provide a choice to settle while preserving the value of the contractual liability leading to a change in the number of shares when their fair value changes are classified as financial liabilities.

## **2.19 Significant accounting estimates, judgements, and assumptions when applying the accounting policy**

In preparing these financial statements in accordance with IFRS accounting standards, management has made judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses.

These estimates are based on information available at the date of preparation of the financial statements, and actual results could differ from these estimates. Adjustments to estimates are recognized in the period in which the estimates are adjusted and in any future periods that are affected.

The main areas that require estimates and judgments are as follows:

- Expected credit losses on receivables – note 2.4
- Valuation of "right-of-use" assets and liabilities under lease agreements - note 2.10
- Recognition of deferred tax assets – note 2.11
- Determination of fair value – note 2.4

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

(All amounts are in BGN'000, unless otherwise stated)

**11. Cash and cash equivalents**

For the purposes of the statement of cash flows, cash and cash equivalents include:

|                       | <b>December 31,<br/>2024</b> | <b>December 31,<br/>2023</b> |
|-----------------------|------------------------------|------------------------------|
| Cash in bank accounts | 2 409                        | 586                          |
| Cash on hand          | 1 079                        | 1 665                        |
| Cash on the way       | 184                          | 32                           |
|                       | <b>3 672</b>                 | <b>2 283</b>                 |

Cash and cash equivalents represent amounts denominated in Bulgarian leva. Cash on hand is non-interest-bearing, while cash in bank accounts is interest-bearing at a floating interest rate.

**12. Microloans granted to individuals**

|                                                                         | <b>31 December<br/>2024</b> | <b>31 December<br/>2023</b> |
|-------------------------------------------------------------------------|-----------------------------|-----------------------------|
| Guaranteed receivables from customers under granted microloans, gross   | 105 185                     | 91 730                      |
| Unguaranteed receivables from customers under granted microloans, gross | 437                         | 861                         |

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

(All amounts are in BGN'000, unless otherwise stated)

**Long-term payables on defined employee benefit plans**

|                                                    | <b>2024</b>  | <b>2023</b> |
|----------------------------------------------------|--------------|-------------|
| <i>Present value of liabilities on January 1</i>   | <i>794</i>   | <i>571</i>  |
| Current Internship Expense                         | 132          | 98          |
| Interest expense                                   | 40           | 38          |
| Retirement benefits paid during the period         | (76)         | (60)        |
| Actuarial (profit) loss for the period             | 132          | 147         |
| <i>Present value of liabilities on December 31</i> | <i>1 022</i> | <i>794</i>  |

The key assumptions used in determining the employee benefit liabilities at retirement are set out below:

|                                 | <b>2024</b> | <b>2023</b> |
|---------------------------------|-------------|-------------|
| Discount rate                   | 4.0%        | 4.5%        |
| Future increase in remuneration | 5.0%        | 6.0%        |

The average duration of the employee benefit liability at retirement is 10.0 years.

The table below presents a sensitivity analysis of the significant assumptions as of 31.12.2024, calculated based on a method that extrapolates the effect on personnel retirement benefit liabilities given a reasonable change in the underlying assumptions at the end of the reporting period.

| <b>Significant assumptions</b> | <b>Amendment</b> | <b>Absolute effect</b> | <b>Relative effect</b> |
|--------------------------------|------------------|------------------------|------------------------|
| Discount rate                  | + 0.50%          | (46)                   | -5 %                   |
| Discount rate                  | - 0.50 %         | 50                     | +5%                    |
| Reward                         | + 0.50%          | 50                     | +5 %                   |
| Reward                         | - 0.50 %         | (47)                   | -5 %                   |

The expected payments as of 31.12.2024 in relation to the liabilities for personnel retirement benefits are as follows:

|                  | <b>Estimated Payments</b> |
|------------------|---------------------------|
| Payments in 2025 | 128                       |
| Payments in 2026 | 37                        |
| Payments in 2027 | 79                        |
| Payments in 2028 | 102                       |
| Payments in 2029 | 98                        |

## **23. Equity**

### **Share capital**

## 25 . Financial risk management

The nature of the Company's activity requires the assumption and professional management of known financial risks, which includes their identification, measurement and management. The Company Performingly reviews its risk management policies and systems to reflect changes in markets, products and/or market practices.

The Company's objective is to achieve an appropriate balance between the risks assumed and the returns received, as well as to minimize the potential adverse effects on the financial results. In this context, risk is defined as the probability of experiencing losses or lost benefits due to factors internal or external to the organization. Risk management is carried out within the framework of rules and procedures approved by the Management. The company identifies, assesses and manages financial risks in close cooperation with operational units. The management sets the principles for overall control and risk management, as well as written policies, regarding areas specific to the Company. The risks that arise in connection with financial instruments to which the Company is exposed include credit risk, liquidity risk, market risk and operational risk, disclosed below.

### A. Credit risk

Credit risk is related to incurring financial losses due to non-fulfilment of the liabilities of the Company's customers, suppliers, and creditors. The credit risk is primarily related to the guarantee services provided to the Company's customers.

The Company's credit policy and its implementation are analyzed on an ongoing basis and changed if necessary at the suggestion of the management. It is responsible for the operational approach to risk management and sets work priorities, according to the risk management strategy and principles, adopts credit risk controls and reviews the procedures and system for its management.

#### A.1. Measurement of credit risk

The valuation of credit risk for the portfolio of micro-loans is done on a portfolio basis and requires the performance of additional calculations of the probability of non-payment at maturity, as well as the related loss rates, correlation dependencies in the portfolio of assets, etc.

For its internal needs, the Company uses its own credit risk measurement and analysis models. These models are subject to periodic review and comparison of their behavior against real quantities, and adjustments are made to the underlying variables to optimize model performance. These credit risk measurement procedures are part of the Company's routine operational activity.

The key inputs used to measure expected credit loss (ECL) are:

- Probability of Default (PD);
- Loss Given Default (LGD); and
- Exposure at Default (EAD).

These data are typically derived from internally developed statistical models and other historical data and are adjusted to reflect probability-weighted forecast information.

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

(All amounts are in BGN'000, unless otherwise stated)

Probability of default (PD) is a forecast of the probability of default over a specified time range. Estimated at a given time. The calculation is based on statistical rating models and is evaluated using rating tools tailored to the different categories of counterparties and exposures. These statistical models are based on internal data including quantitative and qualitative factors. Estimated values are calculated taking into account the agreed terms of exposures and estimated prepayment rates. The rating is based on current conditions adjusted to account for future conditions that will affect the probability of default.

Probability of default is a combination of application valuation and behavioral valuation. A client is considered to be in default when he has not fulfilled his liabilities for more than 90 days or at least one of his exposures has been restructured. During the Performing credit risk valuation process, when a persistently late paying customer is identified, it may trigger a default event, even if the previous two criteria are met (probability of default or an event leading to a probability of default).

Impairment is based on probability of default for 12 months when the customer is not in default and there is no significant increase in credit risk. The significant increase is assessed based on quantitative and qualitative criteria. When one of the criteria for a significant increase in credit risk is present, the corresponding exposure is impaired with a probability of default for the entire term. Full term probability of default is related to the remaining maturity of the loan and default events over the expected term of the financial instrument.

Loss Given Default (LGD) is an estimate of the loss given default and is stated as a percentage of the exposure. It is based on the difference between the contractual cash flows due and those the Company expects to receive. LGD calculation models for unsecured assets take into account recovery time (customer payments or assignment payments). The loss at default varies widely, depending on the characteristics of the counterparty, the type and structural features of the loan, the availability of collateral or credit support of the debtor.

Exposure at default (EAD) is a forecast of exposure at a future date of default, taking into account expected changes in exposure after the reporting date, including payments. Exposure at default and loss given default are measured on a portfolio basis for the underlying pool of micro-loans.

## **A.2. Credit risk management policy**

The Company manages credit risk by setting limits related to single customer, office and other categories of portfolio diversification. Exposure to credit risk is managed through a Performing age analysis of claims for fees under granted guarantees, changing the criteria, requirements and approval procedures for pricing limits and the guarantee itself in a manner appropriate to the situation.

## **A.3. Maximum exposure to credit risk**

For the financial assets owned by the Company, the maximum exposure to credit risk is best represented by their carrying amount as follows:

|                                        | <i>Maximum exposure</i>  |                          |

**B. Liquidity risk**

Liquidity risk is related to the impossibility of fulfilling the Company's liabilities when they become due. Net cash outflows would reduce available cash resources. Under certain circumstances, a lack of liquidity may result in asset sales or the potential inability to meet credit commitments. The risk that the Company will not be able to meet its monetary liabilities is inherent in the activity and can be caused by a wide range of institutional-specific and market events such as mergers and acquisitions activities, systemic shocks and natural disasters, etc.

**B.1. Liquidity risk management policy**

The Company's liquidity management includes monitoring future cash flows. This includes maintaining highly liquid assets; monitoring liquidity ratios from the statement of financial position; management of the concentration and maturity structure of liabilities, etc. An analysis of the agreed maturities of financial liabilities and financial assets is performed.

The Company has a diversified portfolio of cash and high quality, highly liquid assets to meet its current liabilities.

**B.2. Maturity analysis of financial liabilities**

The tables below show the Company's undiscounted cash flows resulting from financial liabilities by remaining contractual maturity. The amounts disclosed are the contractual undiscounted cash flows, including interest, if any.

**As of December 31, 2024**

**C. Market risk**

The Company is exposed to market risk, which is the probability that the fair value or cash flows associated with financial instruments will vary due to changes in market prices. Market risks arise primarily from positions in interest rate, currency and equity products that are exposed to general and specific market movements and changes

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

(All amounts are in BGN'000, unless otherwise stated)

in the level of market rate or price dynamics. Due to the specificity of the Company's financial instruments, it is primarily exposed to interest rate risk.

**C.1 Interest rate risk**

Interest rate risk related to cash flows can occur when changes in market interest rates affect future cash flows from financial instruments. A possible interest rate risk related to the fair value is that when the value of a financial instrument changes due to a change in market interest rates.

The Company is exposed to both risks – related to fair value and related to cash flow. Interest margins may increase as a result of these changes, which in turn would limit potential losses to the Company arising from changes in market interest rates. Trade and other receivables / liabilities are not interest-bearing.

**C.2 Currency risk**

Fluctuations in exchange rates affect the Company's financial position and cash flows. As a result of the currency board, the Bulgarian lev is pegged to the euro at a leva-to-euro ratio of 1.95583/EUR, which means that positions in this currency do not lead to significant currency risk unless the ratio is changed in the future.

**D. Operational risk**

Operational risk is the risk of losses due to systems failure, human error, fraud or external events. When the established control systems and activities do not prevent such events, operational risks may damage the reputation, have legal or regulatory consequences or lead to financial losses for the Company. The Company does not expect to eliminate all operational risks, but strives to manage these risks by building a good control environment, as well as by monitoring and managing potential risks. Control measures include effective segregation of duties, definition of access rights, authorization of transactions, and reconciliation of information from different sources, training and evaluation of personnel, and other types of control.

***E. Fair value of financial assets and liabilities***

For financial instruments that are traded in active markets, the determination of fair value is based on market prices or dealer price quotes. A financial instrument is considered to be traded in an active market if the quoted prices are Performingly available from an exchange, dealer, broker, company of the relevant industry or regulatory agency and these prices represent current and Performingly executed transactions in the market. If the above criteria are not met, the market is considered inactive.

For all other financial instruments, fair value is determined using valuation models. Fair values of loans and receivables, as well as liabilities to third parties, are determined using a present value model based on agreed cash flows, taking into account credit quality, liquidity and expenses; their fair value does not differ materially from their net carrying amount. The fair values of contingent liabilities and non-cancellable loan liabilities correspond to their carrying amounts.

For financial assets and financial liabilities that have a short-term maturity (less than three months), it is assumed that the carrying amount is close to their fair value. This assumption also applies to demand deposits and time savings deposits.

IFRS 7 "Financial Instruments: Disclosure" requires the explanatory notes to the financial statement to contain information on the determination of fair value in accordance with IFRS 13 "Fair Value Measurement" of financial assets and liabilities that are not presented at fair value in the statement of financial condition. IFRS 13 defines a hierarchy of valuation techniques, depending on the extent to which the inputs to the models are observable or unobservable. Inputs that can be monitored include market information obtained from external information sources; unobservable inputs include the Company's assumptions and judgments.

These two types of inputs define the following hierarchy of fair value estimates:

- Level 1 – quotes from active markets for identical financial instruments. This includes listed equity and debt instruments
- Level 2 – inputs other than Level 1 data that can be observed directly or indirectly (ie can be derived from market prices).
- Level 3 – inputs that cannot be observed and/or based on external market information. This group includes instruments whose significant components cannot be observed.

The above hierarchy of valuation methods requires the use of market information whenever possible. When performing the evaluations, the Company takes into account relevant observable market prices in cases where this is possible.

Fair value of financial instruments:

|                                                                     | <i>As of December 31 , 2024</i> |                   | <i>As of December 31, 2023</i> |                   |

**EASY ASSET MANAGEMENT AD**  
**NOTES TO THE INDIVIDUAL FINANCIAL STATEMENTS**  
**For the year ending on December 31, 2024**

---

(All amounts are in BGN'000, unless otherwise stated)

The remuneration of key management personnel for 2024 amounts to BGN 2 433 thousand (for year 2023: BGN 1 930 thousand).

The amount of outstanding loans given to the management personnel as of December 31, 2024 is BGN 1 thousand (as of December 31, 2023: BGN 1 thousand).

Outstanding year-end balances are not collateralized. No guarantees have been given or received for receivables or payments to related parties.

**27. Contingent liabilities**

The company is a party (defendant) to legal disputes related to trade cases. The Company's management, together with the legal advisor, has analyzed the state of litigation and has determined that there are no significant risks that would require the recognition of provisions in the financial statements as of December 31, 2024.

**28. Subsequent events**

For the period after the date of the statement of financial position, the Company has not identified significant or corrective events that are related to its activity during the reporting period and that should be separately disclosed or require changes to the financial statement.

On March 17, 2025, Easy Asset Management AD entered into an agreement to acquire a controlling interest in Easy Asset Management d.o.o., Croatia. Management expects the transaction to be finalized within the 2025 calendar year and the Company's operations in the Republic of Croatia to expand.

On May 8, 2025, a change in the composition of the Board of Directors of the Company was registered in the Commercial Register.

**29. Approval of financial statements**

The individual financial statements as of December 31, 2024 (including comparative information) have been approved for issuance by the Board of Directors on June 26, 2025.
